

MOREN INT'L(DALIAN) CO., LIMITED
Professional supplier for Plastic&Rubber materials

PVC Ca. Zn. One-pack Stabilizers

>>Product Name

Product: PPF750
Stabiliser type: Ca/Zn
Typical phr :4.6 – 6.0
Metal Oxide (%):19.0min
Heating Loss(%): 3.0max
Appearance: white or yellowish Powder

>>Typical formulation

Ingredient	PVC	CaCo3	TiO2	Lubricant	ACR	Stabilizer
Dosage	100	15-25	4.0-6.0	0.2-0.6	1.5-2.0	4.0-6.0

>> Special quality

PPF750 is a Calcium /Zinc based onepack stabiliser specially developed for pipe fitting.
It could wholly displace plumbum salt series and organic tin compounds stabilizers, it is nontoxic, odorless, Cadmium-free, odorless, Cadmium-free, Pb-free and evironment-friendly;
With good heat stability, photo stabilization, sulphide-proof staining, and weather resistance.
With special coupled action, providing good dispersibility to fillings, increasing compatibility with resir improving product performance, reducing the abrasion, extending the service life of machine.
With good toughening and promoting fusion, and plastination flowing.
With good initial coloring and stability in anaphase
Good anti-precipitation, and forming processing, stable during production, prolonging production circle; making the tube wall thick and thin equally; glossing appearance, increasing the bursting properties of water pressure foe the products.

It is recommended to mix in a high speed mixer to 120℃ and cool to 40℃.

>> Applications: Rigid injection pipe fittings

>> Package : The product is supplied in powder form in paper sacks.

>> Suggestion

It should be kept from moister & sunshine during the transportation or storage. All batches are tested to ensure a consistent quality and a certificate of conformity can be supplied with each batch if requested. According to RoHS.

>> More Than Additives
